MAKE AN ENTRANCE.
STYLE. FUNCTION. DURABILITY.
QUALITY, CRAFTSMANSHIP, STYLE AND INNOVATION

Andersen® storm doors offer style options to enhance and complement the entryway of any home. Designed with ease of use in mind — whether buying, installing or owning — Andersen offers a solution to meet your needs.

A Style for Every Home

Our storm doors are designed to make your life easier, with a variety of styles, options and features.

**Fullview Interchangeable**
Let in the maximum amount of light and air while beautifully framing your entryway. (See page 4)

**Fullview Retractable**
Let in an abundance of light while benefiting from convenient, anytime ventilation without removing a glass panel. (See page 6)

**¾ Light Panel Ventilating**
Enhance your entryway with a classic look at an exceptional value with a solid, lower embossed panel. (See page 8)

**½ Light Panel Ventilating**
The ½ light panel offers traditional style with a solid, lower embossed panel. (See page 10)
The Andersen Difference

Andersen storm doors offer many innovative features designed to make them not only easy to use, but also easy to install.

Quality Hardware
Customize your storm door with a variety of hardware options. Select a finish and style that complements the look of your home.

Reinforced Corners
Built-to-last* construction featuring reinforced metal corner brackets helps the door corners stay square over time for long-lasting smooth operation.

Quick Change
Change from insect screen to full glass panel in less than a minute with a simple flip of the handle.

Retractable Insect Screen
Enjoy convenient anytime ventilation with a retractable insect screen that conveniently rolls into the door frame and out of view when not in use.

Time-Saving Installations
Andersen has taken the hassle out of installing a storm door. Install with confidence with our easy and convenient installation systems.

Splineloc® Insect Screen
Has 3X more holding strength than our standard insect screen and a minimal center mullion bar for maximum durability.†

Hardware with Timeless Beauty

A variety of hardware options to enhance your home’s décor — from traditional and classic to simple and contemporary — Andersen has the style to match your needs. See the following product pages for availability.

INSTALLATION SYSTEMS

We’re taking the hassle out of installing a storm door, so there’s no second-guessing. Just a job well-done the first time.

Rapid Install 1

Our Rapid Install 1 door system is the easiest installation option available in the market today. It was designed with the DIY audience in mind. We prehang the door so there is no cutting, minimal drilling and virtually no measuring required. We cut the Z-bars to length, assemble them on the door and drill the handle holes so you don’t have to. Simply take the door out of the package and set it in the opening. The entire install takes less than an hour.*

Rapid Install 2

Our Rapid Install 2 door system offers a universally handed option. It was designed with the DIY audience in mind. We provide an unassembled door with Z-bars cut to length to save time on the installation. The process takes less than two hours, and no cutting is required.*

Pro Install

Our Pro Install door system was designed with the professional installer in mind. We provide an unassembled door with a Z-bar of 81” that can be cut to length. An adjustable U-channel sweep makes necessary adjustments easy once the door is installed. The handle holes are predrilled to save time on the job, and our twist-to-lock hardware installation makes for a quality, easy install.*

</tbody>
</table>

*Available in white with non-embossed panel. **Hardware included in the door package. Printing limitations prevent exact color duplication. See your Andersen supplier for actual finish sample.

*Actual tools required will vary between storm door models. See installation guide for details.
1. Check to ensure door opening and trim allow enough space for a storm door.

**DIMENSION A**: Minimum ¾” width flat trim surface required

**DIMENSION B**: Minimum 1” trim (brickmould) depth required

**DIMENSION C**: Minimum of 2½” door frame (jamb) depth required

*Depending on the depth and location of your entry door handle set, additional clearance may be needed.*

2. Measure door opening in order to determine the size storm door you need.

**RECORD YOUR SHORTEST WIDTH MEASUREMENT:**

\[W:\]

Measure the width of the door opening at the inside face of exterior trim on each side at top, center and bottom and record the shortest measurement.

(See measure points W1, W2 & W3 in the illustration at right)

**RECORD YOUR HEIGHT MEASUREMENT:**

\[H:\]

Measure for the height from the sill to the underside of the brickmould at the top.

(See measure point H in the illustration at right)

3. Determine the size you need based on the door opening measurements and the storm door model that is selected.
